

BIJAY KUMAR SHRESTHA

Full-Stack Web Developer | AI Enthusiast

Kamalbinayak, Bhaktapur, Nepal • sthabeejay2060@gmail.com • +977 9809669333

PROFESSIONAL SUMMARY

Full-stack developer who builds and ships production web and mobile platforms end to end — multi-vendor marketplaces, subscription apps, and social networks serving thousands of users. Specialized in complex payment and financial integrations, including Stripe Connect, In-App Purchases, Plaid, and regional gateways across 10+ systems. Comfortable owning a feature from database to deployed UI, and increasingly focused on building AI-powered product experiences.

PROFESSIONAL EXPERIENCE

UNO Technology — Full-Stack Web Developer

2023 – Present

Promoted from Intern to Full-Time Developer

- **Own end-to-end delivery** of web and mobile platforms across Laravel/Node back ends and React/Next front ends, supporting production traffic for apps with thousands of active users
- **Integrated 10+ payment and financial systems** — Stripe (Connect, subscriptions, payouts), In-App Purchases (iOS & Android), Plaid, Basiq.io, Khalti, Esewa, and Razorpay — powering checkout, automated payouts, and subscription billing
- **Built real-time features** including Firebase live chat, FCM push notifications, and Agora-based video/voice calling, plus ClickSend SMS/email delivery
- **Led codebase refactoring efforts**, restructuring legacy code to improve performance and maintainability, and shipped 20+ tracked app releases
- **Implemented secure JWT auth** with multi-role access control across customers, vendors, admins, and organisation portals
- **Deployed and maintained production apps** via key-based SSH on AWS (S3, EC2), with CI/CD and ongoing reliability and uptime ownership

KEY PROJECTS

Rentsy — Australia's Fastest-Growing Online Rental Marketplace

Tech: Laravel, React.js, MySQL, Stripe Connect, Firebase, AWS S3, ClickSend, Zapier • rentsy.com.au

- Built the full frontend and backend of a multi-vendor rental marketplace spanning 18+ categories with location-based search and dynamic listings
- Designed the complete commerce flow: browsing, cart, date-based rental booking, checkout, order tracking, and automated vendor payouts via Stripe Connect
- Optimized queries and API response times to support **4,500+ items and 400+ rental partners**, with multi-role dashboards and a Rentsy Dollars loyalty/referral engine

WIDI (When I Die Initiate) — Digital Legacy & End-of-Life Planning Platform

Tech: Laravel, React.js / Next.js, MySQL, Stripe, AWS S3, Firebase • widiapp.com.au

- Built a full-stack platform that securely stores documents and memories, auto-released to loved ones upon verified death (via Australian Death Certificate Number)
- Developed Stripe subscription billing across 3-, 5-, and 10-year plans plus storage add-ons, and a time-delayed email scheduler for messages on future dates
- Implemented enterprise-grade encryption for sensitive vault data (PINs, crypto wallet access, credentials) and the secure Initiator Portal triggering the automated email starburst

Become Secure — Attachment Theory Mobile App (iOS & Android)

Tech: Laravel (API), React Native, Firebase, IAP (Apple & Google), Push Notifications • becomesecure.com.au

- Led refactoring of the backend and mobile codebase for performance and maintainability; shipped 20+ app versions across both stores
- Integrated In-App Purchases for weekly, monthly, yearly, and lifetime tiers on App Store and Google Play, with attachment-style-tailored push notifications
- Maintained Laravel APIs powering quizzes, growth journals, progress tracking, badges, and partner connection features

HookedUp — Social Networking Platform

Tech: Laravel, JWT, Firebase, AWS S3, ClickSend, IAP, MySQL

- Built the complete Laravel backend for registration, matching algorithms, events, forums, and real-time chat
- Developed a full social feature set — posts (CRUD), likes, comments, shares, saves, explore feed, bucket lists — with IAP for premium unlocks

AI-Driven Financial Management System — Academic Capstone

Tech: Next.js, Firebase, Gemini API, Chart.js, Python

- Built an AI financial assistant that analyzes spending and delivers personalised advice via the Gemini API, with a CRUD dashboard, Chart.js visualisations, and real-time Firebase sync

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), TypeScript, Python

Backend: Laravel, Node.js, Express.js, Django, RESTful API Design

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB

Payments & Integrations: Stripe (Connect, Subscriptions, Payouts), IAP (iOS/Android), Plaid, Basiq.io, Zapier, Khalti, Esewa, Razorpay

Cloud & DevOps: AWS (S3, EC2), Firebase, Google Cloud, SSH Deployment, CI/CD

Real-Time & Comms: Firebase Chat & FCM, Agora (Video/Voice), ClickSend

AI & Data: OpenAI API, Gemini API, Python (Pandas, NumPy, NLP)

Tools: Git (GitHub/GitLab), DBeaver, TablePlus, Postman, Herd, Play Console, ClickUp, Slack

EDUCATION

Bachelor in Information Technology

2022 – 2025

Phoenix College of Management, Maitidevi, Kathmandu — affiliated with Lincoln University

CERTIFICATIONS & TRAINING

- **Meta Front-End Developer Certificate** — Coursera, 2024
- **Data Science with Python & NLP** — CampusX, 2022 (120+ hours: Pandas, NumPy, ML, NLP, Sentiment Analysis)
